

# GeoHarmonics Ingredient Transparency Sheet

## Blueberry Bliss

| INCI Name                                              | Common Name                         | Skin Benefit                                                                                           |
|--------------------------------------------------------|-------------------------------------|--------------------------------------------------------------------------------------------------------|
| Aqua                                                   | Reverse Osmosis (RO) Water          | Hydrates and supports normal skin function.                                                            |
| Aloe Barbadensis Leaf Juice                            | Aloe Vera Juice                     | Soothes, calms, and hydrates the skin.                                                                 |
| Glycerin                                               | Vegetable Glycerin                  | Draws moisture into the skin for lasting hydration.                                                    |
| Xanthan Gum                                            | Xanthan Gum                         | Stabilizes the cream and creates a smooth texture.                                                     |
| Garcinia Indica Seed Butter                            | Kokum Butter                        | Deeply moisturizes and supports skin softness and elasticity.                                          |
| Simmondsia Chinensis Seed Oil                          | Joboba Oil                          | Softens, conditions, and helps maintain moisture.                                                      |
| Caprylic/Capric Triglyceride                           | MCT Oil                             | Provides lightweight moisture and a silky feel.                                                        |
| Cetearyl Alcohol (and) Polysorbate 60                  | Emulsifying Wax NF                  | Blends oils and water for a smooth, stable cream texture.                                              |
| Cetearyl Alcohol                                       | Cetearyl Alcohol                    | Softens skin and improves cream texture and stability.                                                 |
| Tocopherol                                             | Vitamin E Oil                       | Helps protect oils from oxidation and supports skin conditioning.                                      |
| Phenoxyethanol (and) Caprylyl Glycol (and) Sorbic Acid | Optiphen Plus                       | Helps preserve the product by limiting microbial growth.                                               |
| Citrus Limon (Lemon) Peel Oil                          | Steam-Distilled Lemon Essential Oil | Provides a bright, fresh citrus aroma.                                                                 |
| Tanacetum Annuum Flower Oil                            | Blue Tansy Essential Oil            | Contains chamazulene, studied for anti-inflammatory activity; may help calm the appearance of redness. |
| Vanilla Planifolia Fruit Extract                       | Vanilla Oleoresin                   | Adds a warm, sweet aroma that rounds out the citrus notes.                                             |
